## A GLIMMER OF HOPE

By Laurie Ortiz

We're happy to report that there's been a few positive things coming out of Albany! It's hard to believe, we know, but let's celebrate!

While the 2024-25 NYS budget is still in deliberation, two anti-life measures have been deleted! These measures were included in the bill that focused on health and human services. The first is the

Free Abortions for Out-of-Staters Act, making abortions more accessible, providing abortions free of charge to any who couldn't afford to pay, and providing "practical support." The second would specifically target minors—giving them access to abortions without parental consent or any parental involvement. These measures can be re-introduced at any time, but for now, they're gone!<sup>(1)</sup>

Another victory is that the ever-increasing problem of squatters was addressed due to intense public outcry in NYC. A bill was introduced to simply redefine the term "tenant" in the existing law to exclude squatters. The bill was signed into NYS law by Governor Hochul on April 22 (effective immediately), re-establishing the rights of homeowners and legal tenants.<sup>(2)</sup>

Hallelujah! Our voices CAN make a difference!

## ERA 2.0

By Ayesha Kreutz

There is an amendment to our New York State Constitution being proposed, and within it is a threat to Christian/family values. It is the Equal Rights Amendment (we call it the "parent replacement act") and it's scheduled for a popular vote on November 5, 2024.

Among other things, it provides minor children with the fundamental right to abortion, chemical and late-term, as well as the fundamental right to engage in transgender medical interventions. The ERA empowers Courts to either uphold laws that ignore parental notice or consent or invalidate laws that require parental notice or consent for both of these life-ending or life-altering procedures. It also potentially erodes protections for churches and other religious institutions to teach beliefs that run contrary to these newly-created fundamental rights.

The so-called ERA has a great-sounding name as though it simply promotes 'freedom and justice for all', but it potentially harms children, families, and religious institutions. Its impacts are far-reaching. Find out more by contacting Ayesha at [akreutz@fdfny.org](mailto:akreutz@fdfny.org) or 585.615.9551.

## HEADS UP ON THE WHO

By Barbara Sieber

This May, the U.S. is poised to give away its sovereignty to the WHO's World Health Assembly. In their "Proposal for negotiating text of the WHO Pandemic Agreement", <sup>(1)</sup> a legally binding treaty, the following (a *partial list*) is demanded for all participating nations:

Access to safe water, sanitation, and hygiene<sup>(1)</sup>

Access to healthcare<sup>(1)</sup>

Implement digital health and Vaccine Passports,<sup>(1)</sup> which would...

Guarantee "timely access" to surveillance information which could sever you from your bank account if you step out of line, as China does.

Implementation of "infection prevention and control measures" (more lockdowns, vaccines, personal protective equipment)<sup>(1)</sup>

Of special note is that Agenda 2030 was created in 2015, years ahead of Covid-19.<sup>(2)</sup>

They desire to control the production, delivery, and the use of all medications, to control information, borders, travel, banking, and medical exams. They want to set up a governing body for oversight of all, and expand the scope by emphasizing a 'One Health' and 'Whole/All of society' agenda—recognizing a broad range of aspects of life and biosphere which can impact health. "The potential for mission creep is limitless."<sup>(3)</sup> The control extends to nature/land management as well. Nothing will be out of their jurisdiction.<sup>(3)</sup>

This unelected organization of bureaucrats is led by Dr. Tedros Ghebreyesus, an Ethiopian with strong ties to the Tigray People's Liberation Front and recognized as a brutal terrorist organization charged with crimes against humanity and its people.<sup>(4)</sup> He is behind the green energy push (EVs with limited range), the "let them eat bugs" push, and the "you will own nothing and be happy" push. It's the WHO that is putting farmers out of business, causing migrants to overwhelm countries by bringing drugs and violence. (See past DYK issues.) The ultimate aim is to destroy borders, national identity, and sovereignty, and to reduce populations. (See past DYK issues.) Sadly, our current administration and 193 countries are good with this.<sup>(2)</sup>

What is our role as American citizens? Contact your legislators, email, write, and call FREQUENTLY. Vote for the candidate who stands against the WHO, educate people, and, of course, pray. America will be saved from this tyranny, but people must wake up to the hell on earth they are being saved from.

## WAR ON MOTHERHOOD By Candy Giles

It's hard to believe, but the feminist movement was not *all* about equal rights. It was used and funded by groups (Planned Parenthood) with underlying sinister motives. They were not interested in helping women or their families. The depopulation agenda (see *What Do We Need Humans For?* Feb. DYK) and desire to destroy our Judeo-Christian nation for the sake of the one-world government starts by destroying families. The feminist movement has made working outside the home "liberating" and large families "uncool" (and bad for the environment!!). The sexual revolution of the '60s and the push for legalized abortion further eroded marriage and the family. The Jaffe Memo (seen in Feb. DYK), calls for postponing or avoiding marriage, encouraging homosexuality, and putting fertility control agents in the water—among other evil plans to destroy the family.<sup>(1)</sup>

The Jaffe Memo also encouraged public education as a means to educate children and supposedly free up working moms, allowing public schools to also serve as a place for indoctrination! Ever wonder what happened to home economics classes? Homemaking is uncool now. Even worse was what parents learned as their child(ren) started doing school at home during the Covid-19 lockdowns. They saw anti-Americanism being taught, and that the LGBTQ agenda was rampant. Encouraging lifestyles that don't procreate serve as another way to hurt families.

But there are many stay-at-home moms past and present for us to admire. A wonderful example is Susanna Wesley, the mother of John and Charles who started the Methodist revival in England, bringing it to America. She gave birth to 19 children, but 9 survived. She homeschooled and was known for praying 2 hours a day.

difficult and a poor succeeded with her her faith. She spent an on a rotating schedule, needed that one-on-

*"Behold, children are a heritage from the Lord, The fruit of the womb is a reward. Like arrows in the hand of a warrior, so are the children of one's youth. Happy is the man who has his quiver full of them: They shall not be ashamed," Psalm 127: 3 - 5*

Her husband was provider, yet she children and kept hour with each one knowing that they one attention.<sup>(2)</sup>

Today, many homeschooling moms give their time to their children, often sacrificing either professionally, financially, or both. Eleven U.S. presidents were homeschooled. Some other well-known people whose mothers gave their time are Tim Tebow (Christian NFL & MLB player), singer Justin Bieber (who follows Christ now), Venus & Serena Williams (tennis pros), and former Secretary of State Condoleezza Rice.<sup>(3)</sup>

Mama bears are rising in these days!! They see how they've been misled and made to feel "lesser" by staying home. They are now aware of what is happening in public schools, and are taking a stand or choosing alternatives for their children. There are many groups of moms, like Mom's For Liberty,<sup>(4)</sup> who are being maligned by the left as a hate group!<sup>(5)</sup>

In the book *Hannah's Children: The Women Quietly Defying the Birth Dearth*, Catherine Ruth Pakaluk writes about women who have had five or more children. "What was common... was a certain commitment to the intrinsic value of children and that for most of the women... that commitment... that children are worth having, in spite of the fact that children require us to rearrange our lives in certain ways and require us to make sacrifices. They're worth having for their own sake..." These, and other mothers devoted to raising their children are the quiet, unsung heroes.<sup>(6)</sup>

Motherhood has come under serious attack, but it's alive and well and gaining more favor. Consider joining like-minded men and women of all ages at *A Million Women*, planned on the Mall in Washington DC, on October 12, 2024 to fast and pray for our children and the nation.<sup>(7)</sup>

Coming Soon: The War on Fatherhood

## CANCEL CULTURE FOR SMALL SCALE FOOD PRODUCTION By Ken Wolf

*Who controls the food supply controls the people; who controls the energy can control whole continents; who controls the money can control the world.*

Henry Kissinger

This article will consider how small-scale farms/gardens are being discouraged.

Amos Miller, an Amish farmer in Pennsylvania,<sup>(1)</sup> has been selling meat and dairy products for over a decade with no customer complaints. His products are organically raised using regenerative practices. But the Pennsylvania Department of Agriculture has shut him down. Actually, an interim injunction has been made. He can sell his products out of state, but not in Pennsylvania. He was accused of having E.coli in his dairy.<sup>(2)</sup> Tests have proven this false, and authorities say he doesn't have the right permits/licenses to grow and sell his products. Instead of shutting him down why can't they help him get licensed?

Next, Oregon has rewritten its CAFO definitions. (CAFO = Concentrated Animal Feeding Operation.) "In Oregon, the landscape of small-scale farming is undergoing a shift due to recent regulatory changes affecting water rights and farm operations. These changes are casting a shadow over the future of family farms and local agriculture, invoking a series of legal challenges and widespread concern among the farming community."<sup>(3)</sup> "The state of Oregon has effectively shut down small farms and market gardens on a large scale, and they're sending out cease-and-desist letters to farms and they're using satellite technology to find their victims and send them these letters that say you can't operate."<sup>(3)</sup>

And maybe you saw the University of Michigan study that says home gardening has a larger carbon footprint than conventional agriculture.<sup>(4)</sup> This carbon footprint for home gardens includes trips to Lowes for the wood for your raised beds, fencing, etc. The study doesn't talk about the damage conventional farms create with pesticides, erosion, or soil compaction. It is just about carbon footprints.

So if you think small-scale farms/home gardening is being discouraged, you are right! A good critique can be found on YouTube by a gardener named Brian. If you have time, look it up: <https://www.youtube.com/watch?v=59x4zgJvIHg>.

## AMERICA UNDER ATTACK

By Barbara Sieber

At 1:28 a.m. on March 26, the Francis Scott Key Bridge in Baltimore came, in an instant, tumbling down, killing six construction workers. A Singapore cargo ship, upon leaving the harbor, turned around and struck a main foundational support pylon after losing power. Reporter Lara Logan calls this a "brilliant, strategic attack...on infrastructure." It was early morning with sailors asleep. The ship and load were heavy, and not positioned properly in the channel to make the required turn. The GPS was unencrypted. All control was lost.

The bridge is a significant commuter bridge, designed for the express purpose of safely shipping hazardous material. It connects north and south to the country's supply chain. It's the second busiest strategic roadway for hazardous material (propane, refined gas, flammable material, nitrogen...needed for a healthy economy). The bridge, the shipping corridor, and the port will now be shut down for 4 - 5 years.<sup>(1)</sup>

On January 3, FBI director Christopher Wray testified before Congress that hackers backed by the Chinese government are targeting U.S. water treatment plants and electrical grids—strategically positioning themselves within critical infrastructure systems to "wreak havoc and cause real-world harm."<sup>(2)</sup>

Yet, five hours later, Biden stated, "it's not terrorism," and promised to Build Back Better. Words that enthusiastic progressives like Baltimore Mayor Brandon Scott and Governor Larry Hogan echo, as do world leaders in the WEF. (Think Lahaina, 15 minute cities, EV's)<sup>(3)</sup>

Twenty days later, the FBI opened a criminal investigation.

Interestingly, just thirty days earlier, Biden issued an executive order embedding CISA (America's cyber defense agency) into the cybersecurity of vessels, harbors, ports, and waterfront facilities. While not openly announced, of course, CISA is involved. It was created in 2020 with the sole purpose of controlling online information. Now CISA will be an agency dangerously growing, exponentially, over the coming years "like cancer," being "shoved into everything."<sup>(4)</sup>

Francis Scott Key, whose name the bridge bears, is the composer of The Star Spangled Banner—America's anthem to her resilience to war's attack. Some believe this attack held symbolic meaning to the perpetrators. Others believe it will be a symbol of America's resilience yet again.

Lyrics: "Blessed with vic'try and peace, may the heav'n-rescued land Praise the Power that hath made and preserv'd us a nation!"<sup>(5)</sup>

## THE GAP By Laurie Ortiz

No...not the popular clothing store!

In April's issue of DYK, an article (Ahhhh, Montana...) gave a brief overview of an area in Panama called the Darien Gap that is a vital link in the chain of illegal immigration. The camp, located at the north end of the gap, is a "holding tank/bus depot" where migrants wait for the next bus to America. Thanks to the Biden administration's open borders, migrants from every corner of the globe make the jungle trek to Highway 1. Sadly, many die along the way. They "hopscotch" from country to country by whatever means available, their journeys well organized and funded by the WEF (World Economic Forum) and IOM (International Organization for Migration) to ensure sustainability and in keeping with "Agenda 2030."<sup>(1)</sup>

According to the Panamanian government, the number of migrants "irregularly" passing through the Gap had about doubled from 133,000 in 2021 to 250,000 in 2022, with the majority being from Venezuela. About 72% were men.<sup>(2)</sup> 2023, however, saw an alarming increase in Chinese nationals coming through. Flying into Ecuador where no visa is required, they make their way to Darien. Border Patrol agents have reported 242,587 Chinese illegals in January 2024 alone, with the number from January 2023 to the present topping about 65,000. Many say these migrants are escaping the repressive regime, but curiously the majority are military-age men.<sup>(3)</sup> To help them out, China is building two steel and concrete bridges crossing the two major rivers there, cutting four miles into the jungle for \$42,000,000.<sup>(4)</sup>

And this...HIAS is a refugee resettlement organization that is operating at the camp. This group takes care of making sure the migrants receive all they need (homes, services, etc) once entering the U.S. (illegally).<sup>(5)</sup> DHS Secretary Alejandro Mayorkas served on the board of directors of HIAS before his nomination<sup>(6)</sup> and has visited the camp as acting secretary, proving that he is fully aware of the situation and has allegedly provided funds to grow the camp!<sup>(6)</sup>

We'll explore the "why" of all this in June's DYK.
